

Edward (Dejing) Kong

<https://konaer.github.io/>

edkong831@gmail.com | +1(203) 633 3453 | Piscataway, NJ

Education

New Jersey Institute of Technology

Newark, NJ

- Master of Science in Computer Science GPA(3.8/4.0)

Sep.2020 – Aug.2021

Work Experience

Vastitude Media US Corp.

New York, NY

Software Engineer Intern

May. 2021 – Aug. 2021

- Worked on the front end of the company's website using **HTML**, **CSS** and **JavaScript**
- Designed series of customized directives for displaying reusable components including sidebar and header
- Implemented an SMS verification feature using **Axios** and optimized it with **RabbitMQ** as the message queue
- Optimized **MySQL** databases by improving speed and scalability via Read/Write separation

Sunels International Inc

Totowa, NJ

Software Engineer Intern

Nov. 2020 – Mar. 2021

- Participated in the development of the user interface for an order management application using **React**
- Used lifecycle hooks to tap into key event and respond when data update
- Developed asynchronous means of retrieval of data from the Server and Database using **Ajax**
- Implemented a set of **RESTful** API endpoints for the order management app using **Python** and **Flask**
- Implemented an order search feature using **Elasticsearch** to improve searching efficiency
- Used **Git** as a teamwork and version control system

Select Projects

We-Space | Full Stack Community Blog Website (<http://www.konaer.tk>) (https://github.com/konaer/We_Space)

- Developed a full stack blog website using **Python**, **Django**, **Vue.js** and **MySQL**
- Built user interface by using **Bootstrap**, **JavaScript** and **Vue.js**
- Used **Redis** as cache to accelerate user query speed.
- Deployed application to **AWS EC2** with **Nginx** and **uWsgi** as the web server

I-Space | Full Stack Personal Blog Website (www.ispaceblog.tk) (<https://github.com/konaer/I-Space>)

- Developed a full stack personal blog website using **Java**, **Spring Boot**, **Semantic UI** and **MySQL**
- Implemented features such as data tracking, article recommendation, archiving, categorizing, labeling, and commenting
- Designed web application using **HTML**, **semantic UI** and **jQuery**
- Used **Hibernate**, **Thymeleaf**, and **Maven** as an ORM tool, template engine, and development environment, respectively

ShoutOut2.1 | Android Online Chatting App (https://github.com/konaer/Shout_Out2.1)

- Developed online chatting app through **Android Studio**
- Implemented features including registration, one on one chat, group chat, image and document transfer, and addition and deletion of contacts via **Java**
- Designed and set up a real-time database by using **Google Firebase**

WineTaster | Machine Learning & Cloud Computing application (<https://github.com/konaer/WineTaster>)

- Developed a parallel machine learning (ML) wine quality prediction application in **Amazon AWS** cloud platform
- Built an ML model with **Spark MLlib** in **AWS EMR**, trained ML model parallelly in **AWS EC2** instances
- Implemented a container with **Docker** to simplify model deployment in **Linux** system

Skills

Programming Language: Java, Python, JavaScript, SQL

Frontend: HTML5, CSS, Bootstrap, Semantic UI, jQuery, React, Vue.js, Ajax

Backend: Django, Flask, Spring Boot, Hibernate, MySQL, Redis, RabbitMQ, Elasticsearch,

DevOps: AWS, Docker, Git, Maven, Linux, Postman
